

About the Founder

Mitra Pakdaman is the founder of LA Healthcare Design Inc., a Los Angeles-based interior design studio. Utilizing over ten years of in-field experience, she brings her elegant and innovative design concepts to the healthcare industry.

Mitra received the bulk of her interior design experience at the award-winning company HLW. As a member of their design team, she was involved in design development for Walt Disney®, ESPN®, HBO®, Intuit®, and Equinox®. Since her time at HLW, Mitra has worked independently on upscale hospitality, commercial and residential projects. She now heads LA Healthcare Design Inc., creating state-of-the-art healthcare facilities locally and internationally.

Her own experience over the years led her to the realization that there was a need for spaces that offer patients and staff an environment that better supports healing services. "Time after time, I found myself in medical and dental offices that were dreary or poorly lit or in disrepair. Instead of a comforting space, I was often in rooms that made me anxious or uncomfortable. This was how my vision began, as a patient. I believe that the proper design can create a flow that positively influences productivity and the mood of each person who interacts in that space." At LA Healthcare Design Inc., Mitra creates spaces that meld design and functionality, beauty as well as flow.

Mitra volunteers her time to philanthropic endeavors, such as the design consultation and space planning for the New Design Charter School in downtown Los Angeles and bathroom remodeling for the Santa Monica Aquarium: Heal the Bay project. Fulfilling a decade-long vision, she has initiated projects in Barron, Mexico as well as in Kenya and Burkina Faso in Africa. Her hope is to bring together conscious and dedicated doctors from around the world to provide quality and affordable healthcare to the local communities. Mitra received her B.S. in Interior Design from California State University of Northridge, and currently resides in Los Angeles, California.

Creating Healing Spaces Around The World

When we look at the world as a blank canvas, there are so many amazing opportunities to create and add fantastic colors to this earth with love and joy.

Our mission is to create healing spaces around the globe. We believe we are all one, and this is our way of giving back to humanity, and to our communities.

For our philanthropic efforts at LA Healthcare Design Inc., we're starting with a village called Barron in Mazatlan, Mexico, and Kenya & Dano in Africa.

We're currently in talks with other medical professionals to do the following:

Create healing & safe medical / Dental spaces

Build small facilities (2-3 rooms) + Pharmacy space

Equip the facilities with essential and necessary medical supplies.

If you'd like to be a part of our movement, please send us a message and we'd love to talk to you.

Services

At LA Healthcare Design Inc., we help clients create an aesthetically pleasing and efficient workspace for treatment without sacrificing functionality. Our team provides complete services from design to build, ensuring clients with peace of mind throughout every step of the process.

We offer a comprehensive design process, including but not limited to:

Medical Construction Consultation We offer suggested improvements, designs to create a flowing and harmonic space, and ADA (Americans With Disabilities Act) code advisement.

Medical Interior Design We design work from start to finish, including space planning, material selection, lighting, colors, etc.

Programming: We perform an elaborate analysis of all needs for staff and patients.

Space Planning: We take into consideration traffic flow, functionality, and the effectiveness of the layout. We apply ADA to all of our design and space planning.

Material Selection: We recommend sustainable design, choosing materials that are non-toxic (low to zero VOC), high quality and eco-friendly.

Medical Tenant Improvement Improvements range from replacing finish materials to creating custom designs to meet the client's business branding needs. Based on terms of the lease, oftentimes tenant improvement is paid for by the landlord (listed as "tenant improvement allowance").

Medical As-Built Drawings We provide clear and accurate records of existing conditions, with attention to industry standards. Using on-site measurements, our team at LA Healthcare Design Inc. will update existing CAD files provided by the client or prepare a new set of CAD documentation.

Project management Many of our busy professionals choose to expedite the implementation of design by having LA Healthcare Design Inc. serve as the direct project managers of the contractors. We ensure that contractors adhere to all standards and timelines.

Internal Mission Statement

Our Values:

1. Envision an everlasting design
2. Reciprocate Client Vision into Design
3. Create Design that Heals

Our designs are an embodiment of our company values. As a team, we stand by a common mission to envision and create everlasting designs. We reciprocate client's thoughts into nothing but exceptional designs that promote healing and wellness.

Company Mission Statement

Our Mission:

LA Healthcare Design Inc. was born from the passionate desire to create aesthetic and functional healing spaces. Our mission is to design and implement your healthcare business needs, adding vitality and beauty to the experience of patients and staff alike.

The functional and aesthetic elements of our designs are informed by the individual workplace needs of healthcare professionals, including accessibility and appeal to your patient niche. Our team stays abreast of the newest developments in the changing market, including trends, industry and environmental standards, and technological advances, in order to create the optimal design for your business.

At LA Healthcare Design Inc., we create organic spaces with eco-friendly designs. Our medical and dental offices are individually curated, ensuring that all elements of environmental psychology, spatial planning, color and shape complement one another. Working with various lighting, textures and materials, we create an inviting healing space that encompasses our client's vision.

Internal Mission Statement

Our Core Values:

1. Envision everlasting designs.
2. Reciprocate Client's vision into appealing designs.
3. Create Design that Heals and promotes wellness.

Our designs are an embodiment of our company values. As a team, we stand by a common mission to envision and create everlasting designs. We reciprocate client's thoughts into nothing but exceptional designs that promote healing and wellness.

Company Mission Statement

To create aesthetic and functional healing spaces that add vitality and beauty to the experience of patients and staff alike. Our Vision is to design and implement your healthcare business needs while addressing workplace needs of healthcare professionals, including accessibility and appeal to the patient niche. We aim to create invited spaces with eco-friendly designs while encompassing our client's vision.
